

The Udall Center for Parkinson's Disease Research presents the
1st Annual Udall Parkinson's Disease Research Symposium
Thursday, October 22, 2015 • Kahn Auditorium (BSRB)

Etienne Hirsch, PhD

Director, Institute for Neurosciences, Cognitive
Sciences, Neurology and Psychiatry
French Alliance for Life and Health Science
Associate Director, Institute of Brain & Spinal Cord
Research Center
Pitie-Salpetriere Hospital
Paris, France

"Unmet therapeutic needs in Parkinson disease"

Plenary lecture 9 am

Presentations by Parkinson's disease researchers 10:15 am-1:00 pm

Aaron Kucinski, PhD

Fall propensity associated with multi-system, cholinergic-dopaminergic losses in Parkinson's disease

Samuel Pappas, PhD

Striatal cholinergic abnormalities in a symptomatic model of DYT1 dystonia

Vikas Kotagal, MD

Cardiovascular risk factors and Parkinson disease

Daniel Leventhal, MD, PhD

Understanding dopaminergic contributions to motor control and learning

Magdalena Ivanova, PhD

Bio-molecular aspects of neurodegeneration: alpha-synuclein fibril formation

Nathan Miller, PhD

Effectiveness of a community-based cycling program for Parkinson's disease

Myria Petrou, MA, MD

MR correlates of postural instability in Parkinson disease

Lunch to follow at 1pm in Seminar Rooms A-C
